Education:

Palestine Polytechnic University	B.A in Computer Systems Engineering	Sep 2016 – Jun 2021
---	-------------------------------------	---------------------

Internship History:

QA Automation Engineer	<i>at ASAL Technologies</i>	<i>Aug 2022 – Dec 2022</i>
-------------------------------	-----------------------------	----------------------------

- Expanded knowledge through studying web fundamentals, and API concepts, and adopting a QA mindset.
- Managed testing plans, designed and executed test cases, uncovering and reporting defects using JIRA.
- Manually tested mobile and web apps, prioritizing thorough functionality and user experience assessment.
- Enhanced web app performance through load tests with JMeter.
- Proficiently handled API testing using Postman.
- Developed UI testing scripts using Selenium web driver and Python.
- Conducted exploratory testing to ensure web app resilience and effectiveness.

Training Courses:

QA training program	<i>with Knowledge Academy</i>	<i>Jul 2023- In progress</i>
----------------------------	-------------------------------	------------------------------

- Manual testing, UI testing, API testing, Automation testing, Mobile testing, Cypress, Selenium, Appium, and CI/CD

PMP training course	<i>with The Hope International</i>	<i>Jul 2023- In progress</i>
----------------------------	------------------------------------	------------------------------

- Project management framework, Agile methodology, Stakeholders, Project management process

Software QA testing Advanced level	<i>with The Hope International</i>	<i>Aug 2022 – Nov 2022</i>
---	------------------------------------	----------------------------

- Performance testing concepts using JMeter, Mobile testing and using Appium studio, Agile methodology, SCRUM and DevOps, Automation API testing using Postman, UI automation testing using Selenium web driver.
- Certificate link: [Advanced QA](#)

Software QA testing foundation level	<i>with The Hope International.</i>	<i>Jun 2022 – Aug 2022</i>
---	-------------------------------------	----------------------------

- ISTQB-certified tester foundation level concepts including Fundamentals of Testing, Static Testing, Test Technique, Test Management, and Tools Support for Testing.
- Certificate link: [Foundation QA](#)

Personal Projects:

Manual testing for DocuGen application

- Testing the web application manually, including creating testing plans, designing and executing test cases, and reporting bug reports.
- GitHub Repository: [GitHub link](#)

API testing for PetStore.com

- API testing for the training website PetStore.com using Python and Pytest framework writing test scripts.
- GitHub Repository: [GitHub link](#)

Interpersonal Skills:

- Effectively communicate project updates to the working teams.
- Collaborated with a diverse team of designers, and developers to launch a successful product.
- Enhanced my daily schedule, which has led to increased productivity and minimized task-switching.
- Utilized strong planning skills to organize events and initiatives, resulting in streamlined processes and improved outcomes.
- Acquired new skills and knowledge rapidly, as demonstrated by quickly adapting to evolving technologies.

- Tools:** Postman, Jira, JMeter, GitHub, GitLab
- Programming languages:** Python, Java, JavaScript
- Languages:** Arabic, English
